

Panel Manufacturing & Electrical Installation Services

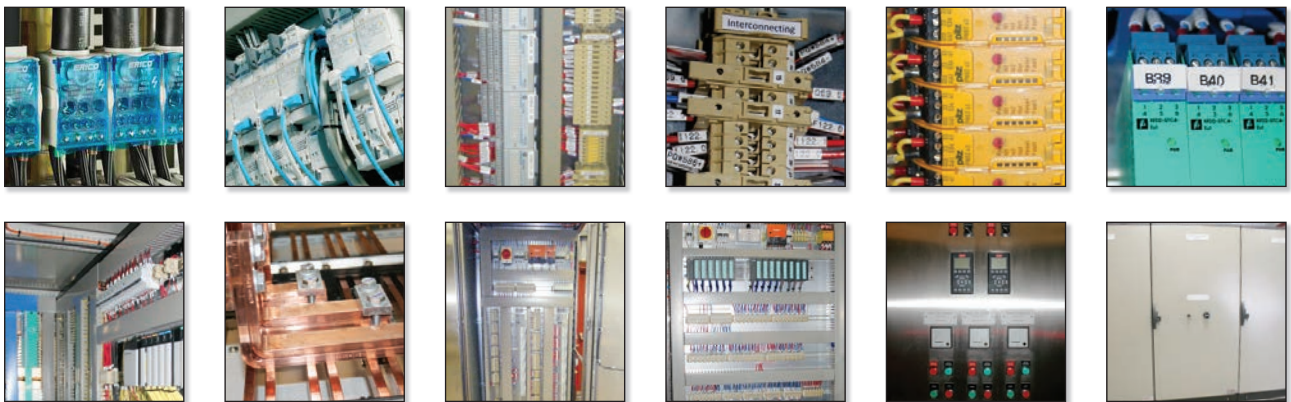

Cal Systems manufacture control panels & fault rated MCC's, power distribution panels & pneumatic panels for the food, brewing, chemical, glass and gas distribution industries.

Our products and services include:-

-  **Control panels**
-  **DC and AC drive systems**
-  **Motor control centres**
-  **Pneumatic panels**
-  **Complete Electrical Installations**
-  **Junction boxes**
-  **Form 4 mains distribution switchboards**
-  **LV Switchboards**

We also offer software design and programming of all major PLC's & SCADA Systems.

Panels can be designed and built to customer specified criteria, with different forms of separation including form 1 to form 4.

Some of our current clients include

All panels are designed & manufactured to relevant European and British standards and directives.

These directives include:-

- ✓ EMC Directive 89/336/EEC
- ✓ Low Voltage Directive 73/23/EEC

- ✓ Machinery Directive 98/37/EEC
- ✓ ATEX Directive 94/9/EEC

Along with specific site guidelines.

All our panels are thoroughly tested in house to ensure our panels conform to client specifications and are of the highest quality. Our testing process also ensures all our panels are fully compliant with all relevant design standards and safety regulations.
